

## MAJOR CONSTRUCTION - SPRING 2025

- **All Businesses will remain open during construction with signage present.**
- **Construction Crew will inform residents on Barnes St. at least one day in advance when they will be working in your right-of-way (driveway) so you have prior access to your vehicle.**

Residents and Business Owners,

With construction season getting ready to ramp up, we wanted to inform everyone about the water main projects you will see around the city this spring.

1. **South Pine River Street** (Center St. – railroad tracks.): The plan is to start with this section on March 17<sup>th</sup> and run a couple of weeks. The Northbound Lane will remain open (one-way) until they get to the intersections, which will take a couple of days. While working at the intersections the whole street will need to be closed.
2. **Barnes Street** (Center St. - North St.): Scheduled to begin at the first part of April. There will be some interruptions to driveways when having to cross along Barnes. The Construction crew of Isabella Corporation will be communicating directly with the residents in advance, so everyone is able to access their vehicles. Residents may have to park at the street for part of this project.
3. **West St. Charles Road** (North Pine River St. – Whispering Pines, then up to Serenity Dr.): This portion should begin around the middle of April. We will keep everyone updated when it gets closer and what traffic interruptions are expected.

***Thank you for your patience during this much-needed work.***

***City of Ithaca***
